PROFILE SUMMARY

Detail-oriented **Computer Science undergraduate** with hands-on experience in **Data Analytics, Business Intelligence, and MIS Reporting** using Power BI, SQL, Python, and Advanced Excel. Skilled at designing interactive dashboards, executing ETL workflows, and translating complex datasets into actionable business insights. Seeking a role as a **Data Analyst / Power BI Developer** to leverage strong data modeling and analytical skills to drive strategic decision-making and automate reporting processes.

TECHNICAL SKILLS

Business Intelligence & Visualization: Power BI (DAX, Data Modeling, Power Query, Row-Level Security, Dashboard Publishing), Tableau basics.

Database & SQL: Relational Databases, Complex JOINS, CTEs, Window Functions, Subqueries, Views, Data Aggregation.

MIS & Advanced Excel: Power Pivot, Pivot Tables, Advanced Functions (INDEX-MATCH, VLOOKUP), Data Validation, Dynamic Dashboard Creation.

Programming & Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), Data Cleaning, Root-Cause Analysis.

Tools & Concepts: ETL Pipelines, Ad-hoc Reporting, KPI Tracking, Git/GitHub.

TECHNICAL PROJECTS

End-to-End Customer Behavior Analysis | [GitHub Repository](#) | Python, PostgreSQL, Power BI, SQL

- **Engineered an automated ETL pipeline** using Python and PostgreSQL to extract, clean, and model 3,900+ customer records for behavioral segmentation (Loyal, Returning, New).
- **Designed an interactive Power BI dashboard** utilizing advanced DAX measures to track KPIs and visualize revenue drivers, uncovering key demographic trends (Male: \$157.9K vs Female: \$75.2K; Young Adult: \$62.1K).

Walmart Geospatial Sales & Performance Dashboard | [GitHub Repository](#) | Power BI, SQL, Python

- **Developed robust Power BI data models** for 2.5M+ rows of sales data, optimizing data refresh speeds by 35% through efficient Power Query transformations.
- **Built automated management reports** tracking \$450M+ in revenue across 50 states, utilizing geospatial analytics to isolate an 18% underperformance issue in the Midwest and proposing inventory adjustments to cut holding costs by 12%.

FNP E-commerce Sales & Customer Analysis | [GitHub Repository](#) | Advanced Excel, Data Modeling, RFM Analysis

- **Performed deep-dive MIS reporting** on 1,000+ orders and 70 SKUs to pinpoint revenue trends and evaluate customer retention.
- **Executed an RFM (Recency, Frequency, Monetary) analysis** to segment the customer base, isolating 19% as "Champions," and implemented ABC inventory classification to improve average delivery turnaround to 5.53 days.

HR Analytics Dashboard | [GitHub Repository](#) | Excel, Data Modeling, PivotTables

- **Created a dynamic HR Information System (MIS) tracker** for 171+ employee records to monitor workforce metrics and track key performance indicators.
- **Built PivotTable-driven management dashboards** to visualize headcount, tenure trends, and a 27.5% attrition rate, enabling stakeholders to proactively identify regional retention risks.

EDUCATION

Graphic Era Hill University

2022 – 2026

Bachelor of Technology in Computer Science

EXTRACURRICULAR & AWARDS

- **Outstanding Project Award:** Final Year Project recognized for creativity and high industrial impact within the Computer Science department.
- **Technical Leadership:** Spearheaded a collaborative team to prototype and deploy a data-driven solution, resulting in a 20% efficiency improvement in project reporting workflows.

CERTIFICATIONS

- **Machine Learning (Stanford University, Coursera):** Focused on supervised/unsupervised learning, model evaluation, and predictive analysis.
- **Python for Everybody (Coursera):** Proficient in Python data structures, data extraction, and file handling.

- **Fundamentals of Data Science (NPTEL):** Comprehensive overview of data science methodologies and statistical analysis.
